

ROV

Seaeye Cougar-XT

The Seaeye Cougar-XT is a compact, highly flexible and extremely powerful electric ROV with working depth of 2000 meters, proven worldwide and recognized for its capability.

Operators now have the ability to undertake a range of demanding work tasks at much lower operating costs.

Seaeye Cougar-XT is designed to accommodate heavier duty tooling via a system of quick-change tool skids, making it ideal for survey work, drill support, light construction projects and salvage support operations.

GENERAL SPECIFICATION

Depth rating	2000 msw
Dimensions (L x W x H)	1515 x 1000 x 790 mm
Weight in air (std)	409 kg
Payload	80 kg

POWER AND PERFORMANCE

Thruster configuration	
Horizontal vectored	4 x SM7
Vertical	2 x SM7
Surface performance	
Forward	170 kgf
Lateral	120 kgf
Vertical	110 kgf
Power required	3ph 380-480VAC 120A 60/50Hz 300kVA

INSTRUMENTS/TOOLING

Video capability	4 channel composite
Gyro	Fluxgate
Lighting	4 x 3250 lumens
Aux channels	4 x RS 232/485
Manipulator	Dual hydraulic skid

DECK EQUIPMENT

Tech Safe LARS/Winch	
----------------------	--

TETHER MANAGEMENT

Type	Garage TMS
Tether length	200 m
